Dear Henry:

I don't know how I can have overlooked talking to you about it last week, but we hope the door isn't shut on the possibility of our moving out to Stanford in February (still taking our Italian trip in April) rather than waiting till July. There are serious difficulties with either plan, in fact, and we have by no means been able to come to a final decision on our own preference. However, one controlling factor would be the availability of the space in Biophysics and this is what I want to bring up now: what is the position on that?

All the more reason I hope we can see you for a little while on the 30th.

I'll be at a Genetics study section at the NIH on September 25-26: does this match any part of your trip?

Yours,

Joshua Lederberg
